

## **Week 39 (2018)**

### **Afraid Of Cancer Or Just Doctors?**

My apologies if I 'go on' about cancer but so many people who follow natural health are afraid of cancer but still do not avoid the causes of cancer that they really should be afraid of.

The number of people getting cancer is continuing to rise in spite of the 'medical mafia' getting billions in donations from charities and governments. All the medical mafia are bragging about is a few people living a little longer by taking drugs that bankrupt the medical systems.

They gave up the cure promises a long time ago and especially since Goldman Sachs (the banksters) advised them to stop searching for real cures as they are not profitable.

#### **What Should You Be Afraid Of?**

1. Missing nutrients in your diet such as Selenium, Vitamin D3, Iodine and many more.
2. Starchy carbs and sugar in your diet.
3. Factory processed foods full of chemicals.
4. Chemically laden foods.
5. 'Unnaturally' farmed fish and meats.
6. Insufficient vegetables, fruits, nuts, seeds, sprouted pulses and health fats.

#### **Be Afraid of Doctors?**

Why be afraid of doctors...is that fair since they are mainly nice people trying to do a good job? It would be if doctors were telling you about the causes of cancers and how easy it is to avoid most of them, but they don't.

Doctors don't tell you that studies show if you have more than double the recommended daily amount of vitamin D3, selenium and iodine in your body you will NOT get cancer in most cases. Published data suggests a huge 4 out of 5 breast cancer reoccurrences—could be prevented simply by quadrupling vitamin D levels and nothing else (without harmful drugs for the rest of your life).

#### **Doctors Are Prevented From Practicing Health Care.**

In most western countries where medicine is under the control of the 'medical mafia' doctors are prevented or too scared to offer health care by advising the public about the 6 real causes of the diseases above. Doctors that want to practice healthcare are threatened with dire consequences if they tell the truth.

## Remember

Your doctor will never be able to confirm the above while the ‘medical mafia’ is given absolute power of your health. You have to take control over your own health care.
