

## Week 28 (2019)

# HealthPoint – The Continuing Story Of The Great Healer

I am on vacation this week with my wife Anne and some of my large family. I am, therefore, keeping off serious topics of discussion. Since we are a family company, it occurred to me you may want to know a little of our history since many of you put so much trust in us when it comes to your health.

**The First Health Solution we created was HealthPoint™ and this is still going strong nearly 30 years later.**

Most people know me for introducing Serrapeptase, Curcumin, MaxiFocus and other powerful nutrition solutions to the world. However, our early success came with the introduction of HealthPoint™, the Electronic Acupressure machine, that we introduced nearly 30 years ago and we are continually improving to this day. Before then, my wife Anne and I had tried various natural health techniques, and most of them, while effective, did not dramatically change people's lives.

HealthPoint™ showed us that the correct natural health tool can be a powerful, safe and effective treatment for dozens of modern-day health conditions. To be clear, it wasn't me who saw the potential – a couple of years earlier Anne had brought home an electronic device that she had acquired to treat her father's arthritic knee. As an electronic engineer in a past life (the early years), I was rather negative about the chance of the device making much difference to his knees. That was the spark for Anne to prove me wrong.

A few days later, her father complained his knee pain was so bad that he could not go out to walk the dogs. She used it on the knee points that the supporting manual indicated. Within about 5 minutes, his knee pain had reduced so much that he was able to complete his walk, pain free.

Anne followed the instructions correctly and a month or so later his arthritic knee was clear and never gave him any problem whatsoever for the remaining 17 years of his life (he died at age 83 from bad hospital care for lung infection).

Anne treated him with the early version of the HealthPoint™ and made sure he had good nutrition for his Parkinson's. This gave him a great life.

## Pain Specialist Dr Julian Kenyon

The device Anne used was based upon a very early design from a UK doctor, Julian Kenyon MD, a leading pain control specialist. After two years of great results, I was convinced enough to put my knowledge towards working on and improving the design. Dr Kenyon supplied his new research into the best waveform and then HealthPoint was born.

## HealthPoint™ – Pain Relief At The Touch Of A Button

HealthPoint™ is an Electronic Acupressure kit that gives you the power to precisely locate acupuncture points, so you can enjoy the benefits of acupuncture – but without the needles! It is easy to use and enables you to quickly become an expert at locating acupuncture points. When these are treated you experience pain relief.

We initially sold the HealthPoint™ via demonstration all over the UK, Europe, USA and Canada. We did not keep count but it has been demonstrated on hundreds of thousands of people and we continually develop and improve it, along with the instruction system and the treatment manual. Today, the manual now shows over 160 different conditions that benefit from acupressure treatment.

HealthPoint™ is arguably the best Electronic Acupressure kit anywhere in the world. We have sold over 50,000 kits since launching HealthPoint™, simply because it worked, based on the medically proven principle of acupuncture!

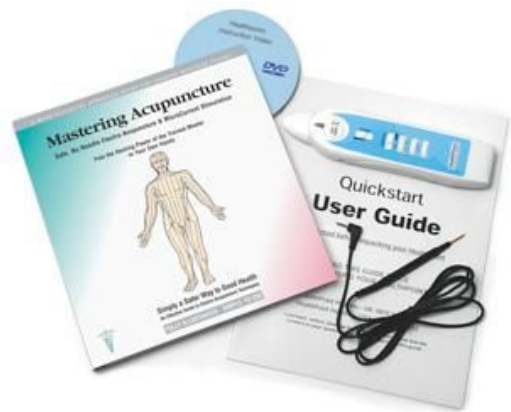

It produced instant results when we demonstrated it on customers who had problems with: Back Pain, Knee Pain, Asthma, Frozen Shoulders, Blood Pressure, Insomnia and many of the other 160 conditions in the manual! It was also picked up on by the press, such as the Daily Mail, who ran the article: 'A home acupuncture machine to beat pain'.

The most amazing demonstration was on people with Macular Degeneration and Diabetic Retinopathy who had an improvement in eyesight within an hour of a demonstration. They would walk around the Home Show exhibition and come back to see us, amazed that we could do what doctors said was impossible.

Why does it help so many conditions? Because it is doing so much more than simply relieving the pain/problem. It is balancing and stimulating the body's own healing system to deal with the problem itself.

Can you use it? Yes, because HealthPoint™ locates the point and tells you with a 'sensation' only when you are on the point. It is completely safe and painless.
