

Health News (Week 21 - 2020)

By Robert Redfern

Of course, I mean, 'risk of dying' with regards to CV. The truth is how would you ever know? Listening to the corporate media even I could be forgiven for being scared. But who is the corporate media? For most people, the Corporate Media is anyone you have ever heard of such as the BBC, CNN, MSNBC, major newspapers and other national Corporate Media. This Corporate Media, except for the BBC, receive funding directly or indirectly from the Pharma/Medical Cartel and their Deep State allies.

I use the BBC only as an example of all the national and international media. I also include international social media, including Facebook and Google. Most media have always had some sort of nationalistic bias but this is no longer a fact. The BBC no longer hides the fact that it does not reflect the wishes of the population majority. This really became apparent when it unashamedly tried to influence the Brexit vote, as well as the general election that followed. It failed on both counts but it still exhibits a bias for the EU and the new Leader of the opposition.

This is Not Political

The BBC, as with most Corporate Media, reflects the advice and interests of the Pharma/Medical Cartel (and, of course their Deep State Allies). For clarity, the Pharma/Medical Cartel includes the drug companies, researchers, charities, and medical authorities in each country, W.H.O., politicians and the political parties who receive Pharma donations.

It's All About Money

You may already know that the Bill & Melinda Gates Foundation recipients and Dr Fauci in the USA are all patent holders for the Covid-19 Virus and will receive huge royalties if vaccinations are ever administered annually.

Most medical doctors don't get money from Pharma but there are a small hardcore number of influential medical doctors who are in the pay of the Pharma. It is hidden in most countries, but in the USA, the law requires every payment to medical doctors is published and is available publicly online. You can also see the billions of dollars in fines paid by Pharma for their criminal like activities. You will get a better understanding by viewing them all [Here](#) These criminal Pharma companies are the very ones pushing to get everyone forced into lockdown until we all get mandatory vaccinated every year.

Was The Previous Flu Vaccine a Factor?

Let's call for an independent investigation into how many of the people who died with CV had a vaccination in the previous six months compared to the population who had not been vaccinated. My creator is telling me the results would be 100:1.

Am I Against Medical Doctors?

No, medical doctors who practice healthcare are my heroes. These are the people and their results I follow to write my books and to create the recovery plans included in them.

In an example recently, two hero doctors practising health care in New York that were interviewed on YouTube had almost 100% recovery rate of near-death patients from CV. However, they had to send this to their patients after a demand from the Federal Trade Commission

Dear patients- I want to let you know that we have been ordered by the Federal Trade Commission (FTC) to stop making any statements about our treatment protocols of Vitamins A, C and D as well as nutritional IV's, iodine, ozone and nebulization to support the immune system with respect to Coronavirus Diseases 2019 (COVID-19).

Crazy but medical doctors giving public reports of their failures and the number of patients dying is OK as it terrorises the population to stay in lockdown.

Medical doctors saving lives are ordered to keep quiet. This is an example showing that the Pharma/Medical Cartel has a plan.

They are Killing People Waiting for Vaccinations

The Corporate Media has not announced one example of doctors saving CV sufferers lives using the promising results when prescribing hydroxychloroquine (hydroxy-chloro-quine) in combination with zinc for the most severely ill COVID-19 patients. Yet there are reports from the thousands of doctors around the world stating that the CV can be safely and quickly treated do exist.

Breaking News: Oxford University is starting a worldwide study of this hydroxychloroquine drug for CV (without zinc). They will make no money from this study but the stand to make millions from their existing study into a vaccine for CV. I give you a 100% guarantee the hydroxychloroquine study will fail.

Robert, You Recommend a Drug?

Yes, for at-risk, severely ill people if that's the best you can get. It's better than another vaccination.

If you are already seriously sick, have had a flu vaccination, or have an 'at risk' condition such as lung or cardiovascular disease then hydroxychloroquine in combination with zinc could be your best option. You may have to go to a private doctor or clinic unless your doctor is a 'rebel'.

New Discovery

Autopsies Prove that COVID-19 is a Disseminated Intravascular Coagulation (Pulmonary Thrombosis)

Pathologists are the best source of real information but unfortunately, their results come out months after the deaths. Autopsies from Italy are now coming to light showing that the CV inflammation is causing sticky blood and clots and was implicated in 86 per cent of the deaths.

I still recommend the 4 Steps below, but now in light of these new reports, I also recommend adding [BlockBuster All Clear](#) for those who are 'at risk'.

We get 'healthy' by following '4 critical' lifestyle actions:

1. Consuming all the vitamins, minerals and other nutrients that 'should' come from really healthy foods. (These nutrients are no longer in foods in sufficient amount and so supplements are needed)
2. Getting sun exposure. Some critical nutrients are created by our body such as D3 when our skin is exposed to the sun. This can be consumed in some foods but only supplements can deliver the tens of thousands of IU that would normally come from maximum skin exposure to the sun.
3. Consuming more resident-friendly bacteria (probiotics) that would normally come from unwashed plants when eaten raw.

4. Breathing properly to obtain the correct oxygen and carbon dioxide exchange from the lungs. This can only happen when we are walking, standing or laying down. It does not function correctly when sitting down.
