

Health News (Week 23- 2020)

By Robert Redfern

I dream of the day when children can go to school and play with their friends? Their parents can go about their daily life and business? They can plan a trip to the park? Visit friends and relatives and maybe take a holiday...? To be clear, stop being terrorised by the Pharma/Medical Cartel.

After 5 months of campaigns of lies by the Pharma/Medical Cartel I no longer simply consider it a criminal organisation that seems happy to pay the \$Billions in fines for their crimes.

It has now become the most terrible terrorist organisation of all time

Crimes Against Humanity

How else can you describe an organisation that will deliberately destroy the lives of hundreds of millions with a carefully orchestrated plan that includes:

1. Lying about a disease that just happens to have patents held on it by two organisations at the centre of these lies that stand to make hundreds of millions in profit if a vaccine or drug is introduced.
2. Putting millions out of work.
3. Destroying millions of businesses.
4. Lying about the correct treatments (see Italy article below).
5. Lying that house arrest for healthy people is necessary.
6. Building an organisation around the world including: the corporate media, government advisors and heads of all of the medical authorities in practically every country to help in their terror campaign.
7. Taking over the World Health Organisation to give authority for their terror campaign.
8. Putting the lives of 'at risk' people at even greater risk by denouncing scientifically proven preventative measures such as Vitamin C, A, D3, Zinc, Magnesium and more.
9. Lastly, using all media and social media to block the truth by brave doctors and researchers of proven treatments. They hide the truth that they're being instructed to put down the fake C.V. codes for unrelated deaths.

Truth Blocking

The Pharma/Medical Cartel have been actively discouraging autopsies/post mortems all over the world so they can hide the real cause of death. W.H.O. gave a false code U07.2. for “suspected” or fake C.V. diagnosis. W.H.O. also started persuading doctors to possibly lie about the cause of death, for example, dying OF, rather than WITH C.V.

Why are some countries reporting low deaths from C.V.?

It is because they are not allowing their doctors to enter the fake U07.2. code. Italy went against the W.H.O. recommendations, and allowed 50 autopsies which reveals the Pharma/Medical Crimes.

The Results!

Italy may have discovered C.V. is not a virus, but a bacterium. It clots the blood and reduces the oxygen saturation from dispersing throughout the body. This went against the World Health Organization's advice that no bodies be autopsied. The Italian Ministry of Health autopsies found the blood was clotted in all of the patient's veins. They immediately started using aspirin 100mg and a anti-coagulant drug and have had immense success. 14,000 people were released from the hospital as healthy and covid free.

Italy is now demanding Bill Gates and the World health Organization be held accountable for crimes against humanity for misleading, misdirecting, and withholding life-saving information from the world, which cost the lives of thousands. Ventilators and ICU units were not necessary, and mandated vaccine is not necessary. If C.V. is a bacterium, it can be easily treated with aspirin and coagulant.

A More Technical Article Regarding This Rehears

Carlie J Gardipee 2020 Discovery:

Autopsies Prove that C.V. is a Disseminated Intravascular Coagulation (Pulmonary Thrombosis)

Autopsies performed by the Italian pathologists has shown that it is not pneumonia but it is Disseminated Intravascular Coagulation (Thrombosis) which ought to be fought with antibiotics, antivirals, anti-inflammatories and anticoagulants.

If this is the same for all cases, that means the whole world is about to resolve this novel pandemic much earlier than expected.

The protocols are currently being changed in Italy who have been adversely affected by this pandemic.

“Thanks to 50 autopsies performed on patients who died of C.V., Italian pathologists have discovered that IT IS NOT PNEUMONIA, strictly speaking, because the virus does not only kill pneumocytes of this type, but uses an inflammatory storm to create an endothelial vascular thrombosis.”, says Carlie J Gardipee.

In disseminated intravascular coagulation, the lung is the most affected because it is the most inflamed, but there is also a heart attack, stroke and many other thromboembolic diseases.

In fact, **the protocols rendered antiviral therapies useless** and focused on anti-inflammatory and anti-clotting therapies. These therapies should be done immediately, even at home, in which the treatment of patients responds very well.

If the Chinese had denounced it, they would have invested in home therapy, not intensive care! So, the way to fight it is with antibiotics, anti-inflammatories and anticoagulants.

An Italian pathologist reports that the hospital in Bergamo did a total of 50 autopsies, the Italian series is the highest in the world. The Chinese did only 3, which seems to fully confirm the information.

In a nutshell, the disease is determined by a disseminated intravascular coagulation triggered by the virus; therefore, it is not pneumonia but pulmonary thrombosis, a major diagnostic error.

Some world leaders doubled the number of resuscitation places in the ICU, with unnecessary exorbitant costs.

According to the Italian pathologist, treatment in ICUs is useless if thromboembolism is not resolved first. **“If we ventilate a lung where blood does not circulate, it is useless, in fact, nine (9) patients out of ten (10) will die because the problem is cardiovascular, not respiratory.”**

“It is venous micro-thrombosis, not pneumonia, that determines mortality.”

According to the literature, inflammation induces thrombosis through a complex but well-known pathophysiological mechanism.

Unfortunately, what the scientific literature said, especially Chinese, until mid-March was that anti-inflammatory drugs should not be used.

Now, the therapy being used in Italy is with anti-inflammatories and antibiotics, as with influenza, and the number of hospitalized patients has been reduced.

He also discovered that many deaths, even people in their 40s, had a history of fever for 10 to 15 days, which were not treated properly.

The inflammation does a great deal of tissue damage and creates ground for thrombus formation. However, the main problem is not the virus, but the immune hyperreaction that destroys the cell where the virus is instilled.

In fact, patients with rheumatoid arthritis have never needed to be admitted to the ICU because they are on corticosteroid therapy, which is a great anti-inflammatory.

With this important discovery, it is possible to return to normal life in time.

At Risk People Include:

- People with diabetes
- People with high blood sugar diet related from carbs and sugar
- Black, Asian, and Minority Ethnic peoples
- People on Pharma Drugs, such as statins etc (especially chemotherapy and especially immunosuppressant drugs)
- People with high blood pressure
- People with heart and cardio-vascular diseases
- People with lung diseases
- People with kidney, liver and other organ diseases
- People over 65 who are not already following my good health plans.

To be clear, other than those who have had an organ transplant, or have a rare disease, there is no reason if a person follows a really healthy plan to be an 'at risk' person.

I have many readers who have changed to the plan including one with cancer for over 20 years who are no longer 'at risk'.

It is not age or the health challenge that determines this but whether a person is going to change from the wrong lifestyle to the right lifestyle.

See my eBooks at the end of this newsletter. To do one thing will bring a little success. To do everything will bring 100% success for most people. The sooner you start the sooner things will change.

In light of the Information from Italy I do recommend anticoagulants and healthy blood products for all 'at risk' people.
