

WEEK 32 (2021)

SERRAPEPTASE – ZOOM WEBINAR

Today's Newsletter

Hello. Welcome to my Thursday Live. Something different this week. On Aug the 17th at 7pm in the UK I am doing another Seminar after the success of the HealthPoint Seminar. Many people appreciated hearing the information directly from me rather than reading all of the information. This one is about the SerraEnzyme serrapeptase and its many formulas. Since virtually every one of the 240 conditions in my book, The Miracle Enzyme, benefits from SerraEnzyme and so it has to be at the top of everyone's list.

This is a preview and run-through of the seminar and I would be grateful if you could email me any questions you have so I can answer them on the 17th. I will try to answer a variety of questions so please email me as soon as you think of one to robert@goodhealth.nu

For New Readers

Thirty-five years ago, my mother died of lung disease at age 62 and my 64-year-old father died a short while later of cancer.

researched the causes of their deaths in-depth. I soon found evidence that the majority of diseases that people prematurely die from are completely preventable.

I discovered evidence that these diseases are mainly caused by an unhealthy diet, lack of critical nutrients, and lifestyle factors – all of which create unhealthy bodies.

Since discovering the scientifically proven causes, I have followed my own health plan. I celebrated my 75th birthday in January feeling truly fit and healthy, and I want to help all my readers to achieve the same feeling, at any age.

The Seminar

Serrapeptase is set to become one of the most widely needed nutritional supplements of all time. This is due to its **effectiveness with over 240 health conditions**, including...

-
- Supporting the natural healing process
 - Offering powerful pain relief
 - Joint mobility support
 - Heart and cardiovascular support
 - Offering post-surgical support
 - A powerful anti-inflammatory
 - General anti-aging support
 - Support for reproductive health

Robert Redfern, officially introduced the enzyme to the world wide web in 1999.
